Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Byrne.

The trimmer of Byrne shows a cover with an edge 24 and a nylon flail that has a larger diameter the diameter of the cover. The edge 35 of housing 33 would inherently function as a cutter.

Claims 7, 11-12, 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Franz. Note that the guard of Franz may considered to be of plural pieces fixed together. It is noted that applicant claims no attaching mechanism or means for the individual pieces but merely plural attached pieces.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byrne. The claimed dimensions of the length and placement of the filament relative to

the guard would appear to be routine matters of design to be determined by an artisan. This would be the same as determining the RPM for the filament as well as the exact type of material therefor.

Claims 8-9, 13-14, 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Franz in view of Byrne. Franz fails to mention the filament length but shows the remainder of the claimed material. Byrne suggests that the filament be of greater radius than the shield. This helps the cutting operation in certain situations. Obviously one of ordinary skill in the art would make the filament of Franz of a greater radius than that of the guard.

Claims 10, 15, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Franz. The rationale here is the same as in the obviousness rejection based on Byrne.
